

Benchrest Seminar

Once again this coming April 7, 2018 Bob White and I will be putting on a Benchrest clinic at the Cherry Ridge Gun Club in Highland Lakes, NJ. This will be our twelfth year of this type of clinic. The first session will be classroom where Bob and I and maybe a guest speaker will discuss things from the history of organized Benchrest, the types of competition, types of rifles used, reloading, rests, tuning and wind reading plus much more. There will be plenty of time to get all your questions answered. The second session will be a shooting clinic where you can have your choice of shooting a Score or Group target.

Over the years this clinic has been a very big success because we have started students that have went on to be IBS Rookie of the year, became a match director holding IBS registered matches at their range and over twenty shooters that regularly attend registered matches. We are working on prizes for the raffle for the participants and I know we have a Sightron scope in the drawing. Anyone interested in attending please contact Bob White at The Shooters Corner 973-663-5159 or Harley Baker at 610-496-6768.

All are welcome from those that just want to check it out, to the beginning shooter that wants to get better or to the seasoned pro who is looking for that nugget to take them to the next level.

Thank you. Harley Baker
