

Agenda Items for Consideration at 2020 IBS Winter Meeting

LRI: Proposed Change to the 600 Yard Shooter of the Year Program

Issue: Currently, Light Gun Overall and Heavy Gun Overall do not count for Shooter of the Year points. This agenda item would remedy the situation.

Proposal: Change Shooter of the Year points calculated to read:

Points will be awarded for the Two Gun Overall, Light Gun Overall, Heavy Gun Overall, Light Gun Score and Group Heavy Gun Score and Group.

LR2: Proposed Change for Two Gun Calculation

Issue: Two Gun Calculations are determined by adding together a shooter's rankings in Light Gun and Heavy gun Score and Group, They are not based on the Shooters Overall Group aggregate and total Score for the match. This essentially turns the Two Gun calculations into an estimate.

Proposal: Calculate Overall Two Gun based on the Shooters Overall Aggregate and Score for the match using the below method.

The overall Two Gun for any shooter will be calculated using the following method:

1. The shooter's two Gun group aggregate will be determined by adding all group sizes shot in LG and HG together and dividing by the number of targets.
2. A shooter's Two Gun score will be determined by adding all scores from targets shot in LG and HG.
3. Shooters will be given a ranking based on the shooters overall Two Gun aggregate (smallest to Largest) and overall Two Gun score (highest to smallest).
4. The Shooter's ranking numbers from overall Two Gun aggregate and overall Two Gun score will be added together to determine overall Two Gun Rank. This ranking will be sorted in ascending order, the lowest number will be deemed the overall Two-Gun aggregate winner.

The procedure for breaking Two Gun Ties will remain the same.

SCI: Proposed Change to Color of Score Targets Used for 100 yards and 200 yards

Issue: Seeing your bullet holes in the black area at 200 yards is sometimes impossible and changing this to red will allow easier recognition as well as easier scoring with the contrast between red and black/grey from bullet holes.

Proposal: This agenda item is to change the color in which the 100 & 200 yard score targets are printed from black to red. There will be NO other changes to the targets. A color change will NOT require any records be retired or started over.

SC2: Proposed Change to 300 yard Score Target

Issue: Having 2 extra sighter bulls will align all score targets across all yardages and give the shooter more options than just the center bullseye.

Proposal: This agenda item is to add the 2 more sighter circles (10 ring and X) to the 300 yard score targets as they are on the 100 and 200 yard targets currently. There will be NO other changes to the target. A change in the sighter target only will NOT require any records be retired or started over. (300 yard targets are already printed in RED).
